

SIMPLE WATER MAKER

The Simple Water Maker Five Reverse Osmosis System produces high quality drinking water quickly and easily. The system features hygienically sealed filter cartridges. Maintenance on the system quick and simple. Compared to a traditional reverse osmosis system the unique Simple Water Maker delivers 30% more flow from the faucet and the 50 gpd membrane quickly refills the storage tank while reducing water waste by 35% compared to other systems. The compact design takes up much less space under the counter.

SINGLE CARTRIDGE	Stage 1	Prefilter	20 micron
	Stage 2	Prefilter	GAC
	Stage 3	RO Membrane	50 gpd
	Stage 4	Postfilter	GAC
	Stage 5	Post-tank filter	Inline GAC
System Dimensions			15.5" H x 9.75" W x 13.5" D

CONTAMINANT REDUCTION

Total dissolved solids	96.5%
Arsenic V	97.8%
Cysts	>99.99%
Fluoride	96.3%
